A Message from Governor William Donald Schaefer:

TDD (301) 333 3098

As I travel throughout our great state, I am continually amazed at the diversity I find here. From the mountains of Western Maryland to our Atlantic shores, Maryland is a place of variety.

The 1990-1991 Maryland Statistical Abstract paints a portrait of our state. It includes complete information about Maryland's population, economy, education, workforce, and transportation modes.

The new abstract is the most complete source of information about our great state and its people. Students, office workers, managers, and citizens will find this book to be an extremely valuable compilation.

We in state government use the information in this abstract to make decisions and offer programs that improve the quality of life for all Maryland residents. We hope it will be as useful for you.

Sincerely,

William Donald Schaefer

Governor

ACKNOWLEDGEMENTS

The Maryland Statistical Abstract is published every other year by the Maryland Department of Economic and Employment Development. The 1990-91 edition was supervised by Irene Tashlick. Michael T. Keehan, John J. Rezai and Adam L. Sidle provided valuable assistance in collecting, organizing, and computerizing the data. Jerry A. Wade and Massoud Ahmadi organized the computer operations. Valarie F. Robinson and Linda L. Stevenson were responsible for clerical and computer operations.

We thank the many contributors to this volume. Notes below each table credit its sources. Wherever private sector sources are indicated, permission to use such material should be obtained from the cited source.

* Figures reflect corrections to the census counts made subsequent to the release of the official figures. Revisions are not available by race.

Note: Differences between 1980 and 1970 Census counts by race seriously affect the comparability for "White" and "Other" populations. A much larger proportion of the Spanish origin population in 1980 than in 1970 reported their race as "Other". Also, in 1970, most persons who marked the "Other" category and wrote in Mexican, Venezuelan, Latino, etc. were reclassified as "White". In 1980, these persons remained in the "Other" category. (Appendix B note in Final Report PC 80-1-B22 MD).

TRADE ACTIVITY IN MARYLAND, ESTABLISHMENTS WITH PAYROLL: 1987

NOTE: In 1982, classifications were based on the 1972 Standard Industrial Classification (SIC) Manual and its 1977 Supplement. For 1987, classifications are based on the 1987 SIC Manual. There are major revisions to the SIC structure for 1987 which limit the comparability of data between the 1982 and 1987 censuses. It was not possible to retabulate 1982 data based on the revised 1987 SIC's for comparative purposes since, in many cases, the necessary information was not available for assigning the new 1987 classifications to the 1982 records. However, 1987 census records were assigned both a 1987 and 1972 SIC-based classification. This table presents the 1987 data assigned a 1972 SIC-based classification, allowing for comparison with 1982 data.

**WHOLESALE TRADE ACTIVITY IN MARYLAND: NUMBER OF ESTABLISHMENTS, SALES,
AND ANNUAL PAYROLL CHANGE: 1987 AND 1982**

NOTE: In 1982, classifications were based on the 1972 Standard Industrial Classification (SIC) Manual and its 1977 Supplement. For 1987, classifications are based on the 1987 SIC Manual. There are major revisions to the SIC structure for 1987 which limit the comparability of data between the 1982 and 1987 censuses. It was not possible to retabulate 1982 data based on the revised 1987 SIC's for comparative purposes since, in many cases, the necessary information was not available for assigning the new 1987 classifications to the 1982 records. However, 1987 census records were assigned both a 1987 and 1972 SIC-based classification. This table presents the 1987 data in two ways: one part according to the 1987 SIC's, the second shows the 1987 data assigned a 1972 SIC-based classification, allowing comparison with 1982 data.

* Personal income includes transfers - payments to persons for which they do not render current services. This component includes payments by government and business to individuals and nonprofit institutions

Transfer payments consist of:

- (1) income maintenance: Federal and State and Local direct welfare (including supplemental security income payments), food stamp payments, and payments made through several other relief programs.
- (2) unemployment compensation: payments to unemployed workers through State, Federal and railroad unemployment insurance programs.
- (3) retirement and other: retirement and disability payments made through the social security programs and through railroad, military, and Federal civilian retirement programs; Medicare; educational assistance to veterans and others; and miscellaneous transfers, such as business payments.

Note on the Poverty Level:

The poverty level is a designation used by the federal government as one means of identifying areas and persons with income levels so low that some economic hardship is likely to be present. Various levels have been determined depending on family size, number of children, and age of the family householder or unrelated individual. The poverty thresholds used in the 1980 census differ slightly from those used in the 1970 census, which took into account the same three factors as well as sex of the family householder or unrelated individual and farm-nonfarm residence. In addition, for the 1980 census the thresholds by size of family were extended from 7 or more persons to 9 or more persons. The income cutoffs are updated each year to reflect the change in the Consumer Price Index. The poverty threshold for a family of four was \$7,412 in 1979. In 1988, the national threshold for a family of four was \$12,091. No further data is available at State and County levels since the 1980 Census.

* The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The index measures price changes from a designated reference date - 1982-84 - which equals 100.0. The change in the index can also be expressed in dollars as follows: for the Baltimore MSA, the price of a base "market basket" of goods and services in the CPI for "All Items" has risen from \$1 in 1982-84 to \$ 1.24 in May 1989.

Note: A small number of lengthy cases can increase an average, particularly in a jurisdiction with a small caseload. For that reason, civil cases over 721 days old, criminal cases over 360 days old, and juvenile causes over 271 days old have been excluded in the above calculations. Approximately 90 to 95 percent of the cases are disposed of within those time periods.

* Beginning in 1987, prices for deliveries to consumers are calculated using only onsystems sales data. Consumption values are not shown since they are reported for onsystems sales data only, and cannot be directly related to consumption volumes which include quantities delivered for the account of others. In previous years, prices were calculated using reported values and values imputed for gas delivered for the account of others.

Note: The Maryland total permits shown in this table differ from the totals in the succeeding table showing residential permits by county. The reason for the difference is that the 17,000 universe for the state data in this table was defined in 1984. The table which provides permits data by county includes data from places that began issuing permits since 1984.
